Academy

ADMISSIONS OPEN

Teaching is a very noble profession that shapes the character, caliber, and future of an individual. If the people remember me as a good teacher, that will be the biggest honour for me.

A. P. J. Abdul Kalam

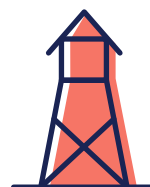

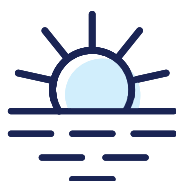

Why STTA

STTA is a professional academy designed to prepare teachers from diverse backgrounds to become innovative and bring in quality change to the world of education.

Academy Programme

STTA Program provides critical & qualitative learning to teachers to train them to understand modern educational practices.

Mission

Capacitate education professionals through effective training modules.

Vision

Establish and impart emphatic and effective training modules to bring in qualitative change in the field of education.

Introduction

“Education is the most powerful weapon which you can use to change the world” (Nelson Mandela)

Education is the key to achieving success and accomplishment in life. Well acquired knowledge leads us to a better future and a better world. In the modern era, education is not restricted to conventional knowledge base and simple classroom engagement only.

At STTA we aspire to ensure that knowledge imparted by education professionals of different sections (pre-primary to higher secondary) is qualitative and challenging, pertaining to the various needs and requirements of the current times.

Owing to this need of the hour, STTA has been established with a purpose to impart a variety of training modules and cater to the needs of different education professionals. They may be planning to take up a career in education, or they may be parents, or educators in service. The modules offered will help all to engage with children (in or outside classroom) in a better manner.

Parents, educators and also health professionals come up with trying issues every day- dealing with tantrums, aggression, anger, anxiety and other forms of strong negative emotions of children. Sometimes we are lost and do not find an answer but some of our modules are promising enough to deal with such issues. Additionally, some of the modules focus on self growth and personality development of professionals also.

About STTA

At Singapore Teacher Training Academy, we impart a variety of trainings pertaining to the need of modern day education. Our training modules are well envisioned and designed by industry experts to deal with various issues in education- understanding early childhood education; dealing with skill enhancement of self in terms of communication or subject knowledge; classroom management; dealing with children with special needs and incorporating an inclusive learning environment; or acquiring leadership skills.

The different courses and training modules offered at STTA are:

- Certification Course on Early Childhood Education for 6 months
- Continuous Professional Development Short Courses for 5-7 Days
- Professional Development Workshops for 1-3 Days
- Distance Learning in Early Childhood Education
- International Study Tour for 1-2 Weeks

Scope of the Courses

Online Certificate course on Early Childhood Education

The modules have been designed to well capacitate Pre Primary school Teachers. The curriculum consists of subjects related to Early Childhood Educational Practices; the Pedagogy of Teaching and practical lessons. The subjects taught are:

Teaching the Montessori Way

Enables the trainees to understand the Montessori Philosophy; and experience the use of the sensorial materials in the Montessori Lab.

Principles of Child Development

Highlights the psychological development of children; the different learning milestones; and behavior management in young children.

Teaching Practices and Curriculum Approaches

Discusses the different approaches and methods of teaching and learning in the context of ECCE. It prepares the trainees towards actual teaching in a classroom.

School Management – Organization & Records

Capacitates the trainees to design preschools, maintain records, communicate and manage events.

Health & Nutrition

This paper provides an insight into the various nutrients required for young children; health and safety; and the components of food and the process of meal planning.

History of Early Childhood Care and Education

This paper focuses on agencies of change in education, in India; some eminent educationist who emphasized on early childhood education and care.

Internships

Guidance to get internship in the city of residence will be provided.
